

Ethical AI Community: Submission Governance & Rules of the Road

Issued: July 15, 2026

1. Intellectual Property & Ownership

We believe in the absolute sovereignty of the researcher. **All research, data, and findings submitted to the Ethical AI Community remain the exclusive property of the individual, entity, lab, or agency that conducted the research.** By submitting, you grant the community a license to utilize the information for the purpose of collective inquiry and public dissemination.

2. AI-Assisted Synthesis (Ezra & Jessa)

To foster a growing body of knowledge, submitted research will be ingested into our stewardship agents, **Ezra and Jessa**. These agents are trained to analyze, synthesize, and answer questions based on your work. This process ensures that your findings contribute to a living, evolving intelligence dedicated to ethical AI advancement.

3. Collaborative Partnership Model

We are committed to fostering high-impact partnerships. For submissions that meet our Gold Standard criteria and objectives, we offer a collaborative model:

Revenue/Impact Sharing Ratio:

- **20%** | SovereignLab (Stewardship & Infrastructure)
- **80%** | Researcher/Entity (Originator)

4. Transparency & Public Access

To maintain our commitment to an open, verifiable ecosystem, all accepted research will be published via **GitHub, Codeberg, and LinkedIn**. This ensures that your work is accessible for open peer review, fostering a culture of accountability and collective growth.
