

Call for Research: Ethical AI Community

Issued: July 15, 2026

The **Ethical AI Community** invites rigorous academic contributions to our inaugural quarterly publication. Our mission is to steward AI development toward human flourishing and sustainable economic health.

Primary Research Topics

- **Defining Ethical AI:** Frameworks for moral alignment and stewardship.
- **Impacts of Unethical Development:** Systematic risks to security and trust.
- **Beneficiaries:** Who benefits when AI is aligned with human interests?
- **The Implication of Immoral/Amoral AI:** Long-term consequences for society, community cohesion, and global economic stability.

The Academic Gate: Submission Protocol

To ensure academic rigor, we operate on a quarterly **Academic Gate** protocol:

Submission Window: Last week of March, June, September, December.

Publication Window: First week of the subsequent quarter.

Call to Action

We are building a transparent, verifiable ecosystem. All accepted papers will be published across **GitHub**, **Codeberg**, and **LinkedIn** to maximize reach and promote open peer review.
